

TiRoBEx Blast Templates

Simply print off (A4 Size) and cut out each strip. Then cut along the black line, up to the small black circle. Each strip will then slide into the next (or itself) to form a free-standing circular blast template. For the size of AI Blast number; notch that many strips together. E.g. Blast Size 4 requires 4 notched strips. For best results print on acetate.

Note: It is recommended that you print out and cut out at least three of these sheets per player.
